*The INTRAVIS LabelWatcher® checks labels and printing accurately and reliably*

Take your production efficiency to the next level with the LabelWatcher®. The extensive statistical functions provide you all of the information and trends that you need to **optimize the operation of your production line**. An optional interface between the labeling machine and the LabelWatcher® is available to allow fully automatic **readjustments of the labeling dispenser heads**. The system will minimize material and product waste and allow you to **clearly meet and exceed quality standards** for decoration and labeling.

The LabelWatcher® is **user-friendly and saves time**. Within just a few steps you can create a completely new setup. **When changing products, valuable time can be saved by simply switching** to a previously saved setup.

The end result is **less time and effort and more reliable operation** of your production line.
